Elegance in Skin Rejuvenation

Basic Manual

for Professional Treatments

(for skin care salons, spas, paramedical estheticians and other skin care professionals)

Seventh Edition — July 2017

Welcome to Rejuvi Professional Skin Care

Combining advanced herbology, the latest dermatological research, ancient beauty secrets from the Orient and modern cosmetic chemistry, Rejuvi provides a unique synergistic approach to skin rejuvenation.

Rejuvi Laboratory, Inc. has developed extensive professional skin treatments for a variety of skin problems & lesions. Rejuvi professional treatments have produced many remarkable before/after results. Consequently, Rejuvi professional treatments are very powerful tools for estheticians, dermatologists and other skincare professionals.

The intent of this manual is to provide basic guidelines for estheticians not experienced with Rejuvi professional products and to enable the skin care professional to easily follow the step-by-step instructions so they may quickly become familiar with Rejuvi treatments.

Skin problems are usually complicated and highly individualized. There is no universal method for solving all skin problems. After becoming familiarized with Rejuvi professional products we highly encourage skin care professionals to modify these procedures or develop their own methods - to 'customize' the treatments.

Please note that there are certain basic Rejuvi products that are consistently used in many Rejuvi professional treatments. Initially you may have to acquire a number of products in order to perform a treatment, however, you will merely need to add a few specialized products to perform other treatments.

We hope that this manual will provide easy access to the powerful Rejuvi professional skin care realm and help improve your business significantly.

Please do not hesitate to contact Rejuvi if you have any further questions or need help with a particular treatment.

Rejuvi Fruit Complex Treatment

Most alpha-hydroxyl acid treatment formulas on the market are glycolic acid solutions with a concentration in 20% to 35% for salon use. These products are merely different in concentration and degree of buffering. The traditional glycolic acid formulas have a number of weaknesses such as limited effectiveness, skin irritation/discomfort during application and skin dryness.

Rejuvi Fruit Complex is an innovative technology incorporating several different alpha-hydroxyl acids including beta-hydroxyl acids with the following major benefits:

- a) Enjoy the extensive benefits of various alpha-hydroxyl and beta-hydroxyl acids.
- b) Fruit Complex utilizes acids and their corresponding salts or esters to achieve excellent safety and comfort levels during treatment.
- c) Fruit Complex incorporates a unique lipopeutical vehicle (liposome-like delivery system) to enhance the penetration and minimize skin irritation.

Rejuvi Fruit Complex formula is available in versions #1 and #2. Version #1 is comparable to traditional 25% glycolic acid solutions. Version #2 is comparable to traditional 35% glycolic acid solutions. Higher strengths are also available to dermatologists upon request. Fruit Complex is a basic Rejuvi treatment with extensive applications such as smoothing skin, reducing pores, diminishing wrinkles, etc. Often time Rejuvi Fruit Complex Treatment is incorporated with various other Rejuvi professional treatments.

Treatment Products Required:

- 1. Rejuvi Fruit Complex Formula #1
- 2. Rejuvi Fruit Complex Formula #2

Rejuvi Fruit Complex Treatment

Other Products Needed:

1. Rejuvi "k" Facial Cleanser
2. Rejuvi "r" Skin Refreshener
3. Rejuvi Purifying Mask
4. Rejuvi "h" Skin Healing Gel
5. Rejuvi "v" Nourishing Cream or "b" Skin Moisturizer or "n" Night Cream

Ingredients:

Rejuvi Fruit Complex formula #1 or # 2:
deionized water, ethanol, polysorbate 60, sodium lactate, sodium citrate, glycolic acid.

Treatment Procedures:

1. Cleanse the skin thoroughly with Rejuvi "k" Cleanser twice, then dry.
2. Using a cotton pad, apply Rejuvi "r" Skin Refreshener – pat on then allow to dry.
3. Apply Rejuvi Purifying Mask mixed with "h" Skin Healing Gel (3:2 ratio). Leave on 6-8 minutes to dry and then rinse off thoroughly.
4. Shake Rejuvi Fruit Complex #1 or 2 well (make sure the solution is uniform to ensure even distribution of liposomes) & pour an appropriate amount of Fruit Complex into a cuvette or tiny vessel.
5. Using a brush, apply the Fruit Complex over the area to be treated on the face and neck - allow to remain on the skin 1-5 minutes depending on skin sensitivity. Keep a close eye on the client to make sure skin doesn't get too red. If significant discomfort develops, rinse off immediately with cold water and apply Rejuvi "h" Skin Healing Gel to calm the discomfort level.
6. Remove Fruit Complex by washing several times with soft cosmetic sponges or a cool, damp towel.
7. Apply Rejuvi "h" Healing Gel and massage into the skin gently for 2-5 minutes.
8. Apply Rejuvi "v" Nourishing Cream or other Rejuvi Moisturizer.

If doing a full facial treatment, apply Fruit Complex treatment before steam and extractions and usually before a facial massage. Rejuvi AHA treatments can be done once a week depending on the skin condition. One treatment period usually involves 4-6 treatments. It is wise to start with a lower strength to cautiously assess your client's skin type and tolerance as well as determining the retention time of the Fruit Complex Treatment. In the case of very sensitive skin, Rejuvi "c" Skin Care Formula (equivalent to 10% strength) may be used to substitute for Fruit Complex Formula #1.

Home Care Program:

Morning: "x"-cell Vitamin C Complex, "b" Skin Moisturizer, "s" Facial Sun Block
Evening: "x"-cell Vitamin C Complex, "g" AHA Cream or "g" AHA Serum (for oily skin).

Rejuvi Acne Treatment

Rejuvi has developed revolutionary products for the treatment of acne. Rejuvi Acne Treatment utilizes alpha-hydroxyl acids, urea peroxide and salicylic acid to effectively cleanse blemished skin and remove the micro-comedones. An over-abundance of male hormones can produce an excess of sebum which can clog pores causing acne and pimples. Rejuvi Acne Treatment effectively inhibits excessive skin hormones with the special combination of organic acids, zinc and vitamins. This anti-androgen approach is Rejuvi unique feature. This multiple action approach makes Rejuvi Acne Treatment far superior to other available acne treatments.

Treatment Products Required:

1. Rejuvi Normalizing Formula
2. Rejuvi "p" Normalizing Cream
3. Rejuvi Conditioning Formula
4. Rejuvi San-Clean

Other Products Needed:

1. Rejuvi "f" Facial Cleanser
2. Rejuvi "r" Skin Refreshener
3. Rejuvi Purifying Mask
4. Rejuvi "h" Skin Healing Gel

Ingredients:

Rejuvi Normalizing Formula:

deionized water, propylene glycol, sodium lactate, sodium citrate, glycolic acid, ethanol, glycerin, urea peroxide, zinc sulphate.

Rejuvi Acne Treatment

Rejuvi "p" Normalizing Cream:

deionized water, propylene glycol, decyl oleate, cetyl alcohol, PEG-100 stearate, glyceryl, stearate, glycerin, stearic acid, polysorbate 80, evening primrose oil, urea peroxide, zinc sulphate, pyridoxine hydrochloride, essential oil.

Rejuvi Conditioning Formula:

deionized water, propylene glycol, SD-40, salicylic acid, zinc sulphate, pyridoxine HCl

Rejuvi Sani-clean:

ethanol, aloe vera gel, propylene glycol, isopropanol, glycerin, phenoxyethanol, fragrance.

Treatment Procedures:

1. Cleanse face with Rejuvi "f" Facial Cleanser and then rinse with water.
2. Steam face for about 5 minutes.
3. Apply Rejuvi Normalizing Formula Solution to face with cosmetic brush, avoiding eye area. Leave on for 5 to 10 minutes then rinse well.
4. Extract comedones if necessary. Painaway Solution could be applied before extraction to minimize discomfort (see Figure 1). Then Rejuvi Sani-clean may be applied onto the extracted area for disinfection (1-3 minutes).
5. Tone skin with Rejuvi "r" Skin Refreshener.
6. Mix Rejuvi Purifying Mask with Rejuvi "h" Skin Healing Gel (about 2:1 ratio) to adjust applicability (thickness). Apply to face and leave on about 10 minutes, then wash off well with water.
7. Mix one teaspoon of Rejuvi "p" Normalizing Cream with a few drops of Rejuvi "r" Skin Refreshener, and then apply mixture with a brush to entire face.
8. Run high frequency (HiFi) over entire face for 2 to 3 minutes (optional) then remove any excessive product with dampened cotton pads
9. Complete treatment by applying Rejuvi Conditioning Formula to the entire face and leave on for at least 6 hours (no washing).

Figure 1.

Home Care Program:

Morning: "g" AHA Serum or "g" AHA Cream (for oily skin).

Evening: Apply "p" Normalizing Cream (For Open Acne) to entire face except eye area. Use "p" Solution for Acne Skin as "spot treatment" (only on the pimpled area and on the top of "p" Normalizing Cream. If there is no inflamed pimple, switch to regular "p" Normalizing Cream and apply onto the acne area only.

Note: Use Rejuvi "p" Skin Conditioner twice per week in the evening (don't use "p" Normalizing Cream or "p" Solution for Acne Skin)

Rejuvi *Tough* Acne Treatment

Rejuvi Tough Acne Treatment is very innovative & effective for treating acne conditions that have not responded to other treatments. This treatment has produced many remarkable results. Always try the regular Rejuvi Acne Treatment first before using this treatment.

Treatment Products Required:

1. Rejuvi Normalizing Formula
2. Rejuvi Fruit Complex Formula #2
3. Rejuvi Conditioning Formula
4. Rejuvi Sani-clean

Other Products Needed:

1. Rejuvi "f" Facial Cleanser
2. Rejuvi "h" Skin Healing Gel
3. Rejuvi Purifying Mask
4. Rejuvi Herbal Mask
5. Rejuvi "r" Skin Refreshener

Ingredients:

Rejuvi Conditioning Formula:

deionized water, propylene glycol, SD-40, zinc sulphate, pyridoxine HCl, salicylic acid.

Rejuvi Normalizing Formula:

Deionized water, propylene glycol, ethanol, sodium lactate, sodium citrate, glycolic acid, glycerin, urea peroxide, zinc sulphate.

Rejuvi *Tough* Acne Treatment

Rejuvi Fruit Complex #2:

Deionized water, ethanol, polysorbate 60, sodium lactate, sodium citrate, glycolic acid.

Rejuvi Sani-clean:

ethanol, aloe vera gel, propylene glycol, isopropanol, glycerin, phenoxyethanol, fragrance.

Treatment Procedures:

1. Cleanse face with Rejuvi "f" Facial Wash and rinse well.
2. Mix enough Rejuvi "h" Skin Healing Gel with Rejuvi Purifying Mask (about 2:1 ratio) until consistency is appropriate for application, then apply all over face. Use steam over mask (about 5-7 minutes) to help ease extractions.
3. Extract comedones with lancet if needed (may use Painaway Solution to reduce discomfort).
4. Apply Rejuvi San-clean on extraction area for disinfection (1-3 minutes).
5. Apply Rejuvi Normalizing Formula over entire face using cotton pads and leave on for 5 to 10 minutes. Do not wash off.
6. Apply Rejuvi Fruit Complex #2 directly on the acne area & over the Normalizing Formula and leave on about 5 minutes.
7. Rinse face thoroughly with cool water.
8. Apply Rejuvi "h" Skin Healing Gel Then Rejuvi "m" Massage Oil. Massage lightly to blend over face and neck area.
9. Place dry gauze over face and neck then use high frequency (HiFi) over the gauze. On raised cysts apply high frequency for 3 seconds on each cyst several times.
10. Remove gauze - do not rinse.
11. Mix Rejuvi "h" Skin Healing Gel with Rejuvi Herbal Mask (1:1 ratio) and apply to face and leave on for 5-10 minute - this will relieve redness.
12. Remove the mask with warm water then tone the skin with Rejuvi "r" Skin Refresher.
13. Apply Rejuvi Conditioning Formula all over face and leave on overnight (or at least 6 hours).

Home Care Program:

Morning: *Cleanse with "f" Facial Wash, tone with "r" Skin Refresher, "g" AHA Serum or "g" AHA Cream (for oily skin).*

Evening: *Cleanse with "f" Facial Wash, tone with "r" Skin Refresher. Apply "a" Night gel and "p" Normalizing Cream over the Night Gel. Use Rejuvi "p" Skin Conditioner every other day under "a" Night gel (no "p" Normalizing Cream).*

Rejuvi Gentle Milk Peel

Rejuvi Milk Peel (Peeling Formula) utilizes natural extract from sour milk (lactic acid), papain (enzyme from papaya), and salicylic acid (from natural plants). Rejuvi Milk Peel provides a safe skin exfoliation process without side effects often associated with phenol and TCA peels.

Rejuvi Gentle Milk Peel Treatment is a unique way to achieve excellent skin improvements without visible skin exfoliation. This method is applicable to most skin types and is risk-free for estheticians. It combines Rejuvi Fruit Complex Formula and Rejuvi Peeling Formula to impart the benefits significantly more than any alpha-hydroxyl acids (AHA Treatment).

Improvements in elasticity, skin tone and skin smoothness plus the reduction of fine lines are the major benefits of this treatment. It is recommended to perform this treatment once per week. A treatment period usually includes 4 consecutive treatments. It is highly recommended to stop for one month before starting a new treatment period (to minimize possible hyper-pigmentation).

Treatment Products Required:

1. Rejuvi Fruit Complex Formula #1
2. Rejuvi "c" Skin Care Formula
3. Rejuvi Pre-Peel Solution
4. Rejuvi Peeling Formula

Other Products Needed:

1. Rejuvi "k" Facial Cleanser
2. Rejuvi Purifying Mask
3. Rejuvi "h" Skin Healing Gel
4. Rejuvi "x"-cell Vitamin C Complex
5. Rejuvi "h" Super Soothing Lotion

Rejuvi Gentle Milk Peel

5. Rejuvi Hydrating Mask (optional),
6. Rejuvi "b" Skin Moisturizer or "v" Nourishing Cream
7. Rejuvi "s" Facial Sun Block (SPF40, optional)

Ingredients:

Rejuvi Fruit Complex: water ethanol, polysorbate 60, sodium lactate, sodium citrate, glycolic acid.

Rejuvi Pre-Peel Solution: water, ethanol, dipotassium glycyrrhizinate, stearyl glycyrrhetinate.

Rejuvi Peeling Formula: ethanol, lactic acid, papain, resorcinol, salicylic acid, water, glycerin.

Rejuvi "c" Skin Care Formula: deionized, water, propylene glycol, glycolic acid, sodium lactate, ethanol, citric acid, triethanolamine (TEA).

Treatment Procedures:

1. Cleanse entire face with Rejuvi "k" Facial Cleanser and rinse well.
2. Apply Rejuvi Fruit Complex Formula #1 to entire face, avoiding eye area, and leave on for 2-3 minutes then rinse well. For sensitive skin, please use Rejuvi "c" Skin Care Formula. For acne skin, Rejuvi Normalizing Formula may substitute for Fruit Complex Formula #1.
3. Mix Rejuvi Purifying Mask with Rejuvi "h" Skin Healing Gel (2:1 ration) and apply to the entire face. Leave on for 5-10 minutes then remove with water.
4. Apply 1 or 2 coats of Rejuvi Pre-Peel Solution (by brush). After each coat, wait 30 seconds to dry (either facial tissue or a hand fan/portable electrical fan can be used). Pre-peel Solution will reduce any discomfort associated with Rejuvi Peeling Formula.
5. Apply 1-2 coats of Rejuvi Peeling Formula using a sizable brush. Make sure to dry well with hand fan or portable electric fan after each coat.
6. Wait for 10 - 20 minutes (depending on skin type) then rinse well with cool water.
7. Apply Rejuvi "x"-Cell Vitamin C Complex and then apply Rejuvi "h" Super Soothing Lotion. For dry skin, Rejuvi Hydrating Mask could be applied for 5-10 minutes afterwards (optional).
8. Complete the treatment with Rejuvi "s" Facial Sun Block on top of "h" Super Soothing Lotion.

Home Care Program:

Morning: Apply "x"-Cell Vitamin C Complex and then apply "h" Super Soothing Lotion . Then apply "s" Facial Sun Block (SPF40).

Evening: Apply "x"-Cell Vitamin C Complex then apply "h" Super Soothing Lotion.

Caution - Do not use any aggressive Rejuvi products for one week after this treatment.

Rejuvi Deep Milk Peel

Rejuvi Peeling Formula can be also used to achieve a deep or visible skin exfoliation. This is called Rejuvi Deep Milk Peel. The deep peel exfoliates significantly more skin layers than Rejuvi Gentle Milk Peel. Consequently, it is effective for tough skin problems such as depressed pits, acne marks, stretch marks, deep wrinkles, and other skin blemishes. Rejuvi Deep Milk Peel is a powerful aesthetic tool for tough skin problems.

Rejuvi Deep Milk Peel is not suitable for sensitive skin or allergic skin. Therefore, a candidate should be carefully screened for such treatment (usually 2 gentle Milk Peel could check skin compatibility fairly well). The client must be well educated and cautioned for home care after treatment (it is recommended to sign consent)

In general, Rejuvi Deep Milk Peel should not be performed in hot summer or in climates with strong sunlight. It is not recommended to perform a deep peel on a client more than twice per year, i.e., once for six months unless for a particular problem such as depressed pits or acne marks. For such conditions, one treatment per month with a few consecutive treatments (2-4) is usually needed. No microdermabrasion should be performed within 30 days before Deep Milk Peel. Do not perform Deep Milk Peel on opened skin such as inflamed acne or broken skin.

Due to the melanocyte activity, there is a possible risk of hyper-pigmentation for Asian skin or dark skin. A special caution must be taken for sun protection or anti-pigmentation.

Treatment Products Required:

1. Rejuvi Pre-Peel Solution
2. Rejuvi Peeling Formula

Other Products Needed:

1. Rejuvi "k" Facial Cleanser
2. Rejuvi Purifying Mask
3. Rejuvi "h" Skin Healing Gel
4. Rejuvi "h" Super Soothing Lotion

Rejuvi Deep Milk Peel

Ingredients:

Rejuvi Pre-Peel Solution:

deionized water, ethanol, dipotassium glycyrrhizinate, stearyl glycyrrhetinate.

Rejuvi Peeling Formula:

ethanol, lactic acid, papain resorcinol, salicylic acid, water, glycerin.

Treatment Procedures:

1. Thoroughly cleanse area to be treated with Rejuvi "k" Facial Cleanser (no any scrubbing).
2. Mix equal amounts of Rejuvi Purifying Mask & Rejuvi "h" Skin Healing Gel then apply to the entire face and allow drying for about 10 minutes.
3. Remove the mask and dry the skin thoroughly. Rejuvi "h" Skin Healing Gel may be used to massage the dried mask so that the mask can be removed easily.
4. Apply Rejuvi Pre-Peel Solution over the face with a brush (1 coat) and let it dry for 1 minutes. Then apply the second coat and allow drying for 1-2 minutes. Using a dampened cotton pad or sponge to wipe off the fine residual particles of Pre-peel solution on the skin. Dry the skin thoroughly with facial tissues. Pre-peel solution could reduce the stinging or discomfort associated with by the Rejuvi Peeling Formula.
5. Make a special cotton applicator - a wooden rod or chopstick wrapped with cotton pad (either square or round). Rub the wrapped cotton with damp palms to make sure cotton pad firmly staying on the rod (see Figure 2 for how to make the special cotton applicator).
6. Transfer 5-8 ml of Rejuvi Peeling Formula to a tall and narrow glass beaker or vessel. Then dip the cotton applicator into the solution and make sure no dripping. One dipping for one coat (entire face).

Rejuvi Deep Milk Peel

Figure 2. How to make special cotton applicator for Deep Milk Peel

Wrap a wooden rod or chopsticks with a cosmetic cotton pad (square or round)

Wrap tightly and then rub the rod with damp palms afterwards

Now the special cotton applicator is ready to use

Rejuvi Deep Milk Peel

7. Apply Rejuvi Peeling Formula evenly and lightly onto the face (forehead and nose first, then two cheeks, finally mouth, chin and neck area, do not apply on eyelid, see Figure 3). After finishing one coat, immediately dry the face with a hand fan or a portable electrical fan (do not use fan during coating).
8. Repeat step 6 & 7, make a mark for each coat on a piece of paper. Apply 12 - 18 coats until a frosted, layer on the face is observed. If the frosted layer can not be seen well, just apply 20 coats to insure a good peel (more coats will not cause skin damage). The treatment is then completed and explain to client clearly, about "Care After Treatment" (a written instruction should

be given, see Page 14).

Figure 3.

Home Care Program:

1. No water contact with the face for 60-72 hours (2.5 to 3 days).
2. After 2.5 or 3 days, the client may rinse face with cool water and dry with gentle tapping of facial tissue or soft towel. Rejuvi "h" Skin Healing Gel must be applied generously several times per day (important for skin peel).
3. The skin will feel tight during the initial few days and will start to peel in 5th - 7th days. Do not force the skin to peel, let it peel naturally. No sun exposure.
4. After the skin exfoliating is complete, the newborn skin may be a little reddish and tender. Apply "x"-cell Vitamin C Complex first and apply "h" Super Soothing Lotion. Rejuvi "s" Facial Sun Block must be applied on the top of "h" Super Soothing Lotion before any sun exposure. Sun exposure must be minimized.

Caution - do not use any "aggressive" products (AHA products) for 4 weeks after

Deep Milk Peel.

(Make copy for Customer)

HOME CARE INSTRUCTIONS AFTER DEEP MILK PEEL

After Rejuvi Deep Milk Peel treatment, it is important for customers to follow the aftercare procedures to insure the desirable result and safety.

1. Stay away from water and any other facial product for 60 - 72 hours.
2. Wash your face with water after 60 - 72 hours (gentle tapping only). Then apply Rejuvi "h" Skin Healing Gel generously three times a day (do not use any other product).
3. Use Rejuvi "h" Skin Healing Gel every day until your skin totally peels off. Usually the skin starts to peel off in 5 -6 days after treatment. Do not force skin to peel off and let your skin peel off naturally.
4. After complete skin exfoliation, apply Rejuvi "h" Super Soothing Lotion to help skin recovery in the morning and evening for a week. Rejuvi "k" Facial Cleanser may be used 10 days after the treatment.
5. Two weeks after the treatment, apply Rejuvi "x"-cell Vitamin C Complex and Rejuvi "v" Nourishing Cream as well as Rejuvi "s" Facial Sun Block (SPF40) during the daytime. Use Rejuvi "x"-cell Vitamin C Complex and Rejuvi "n" Night Cream at nighttime. You can wear makeup at that time.
6. Avoid even moderate sunlight or heat within a month from the treatment.

Notes:

- * Your new skin will be brownish red and will become lighter and fresher after a month.
- * It is okay if the skin around your mouth becomes darker. It will go back to normal after a month.
- * To minimize itchiness, it is recommended to avoid sea food for about a month.

Rejuvi Scar/Stretch Mark Treatment

See Rejuvi Scar Reduction Leaflet because this section needs to be updated in the Manual 8th edition in 2020

Due to the unique formulation, Rejuvi Peeling Formula has been discovered to have special functions: it normalizes skin cells & tissues and stimulates proliferation of fibroblast to increase dermal collagen and elastin.

These functions provide an effective treatment to diminish scars and stretch marks. It is important to use Rejuvi "a" Retinyl Serum and "m" Massage oil for 5-7 days before and after a scar treatment to condition or prepare the skin for desired improvements.

A treatment period (with preparation) usually takes 14 days and several consecutive treatments (1-4) may be performed to achieve significant improvements.

Treatment Products Required:

1. Rejuvi Peeling Formula
2. Rejuvi "a" Retinyl Serum
3. Rejuvi "m" Massage Oil

Other Products Needed:

1. Rejuvi "k" Facial Cleanser

Ingredients:

Rejuvi Peeling Formula: ethanol, lactic acid, papain resorcinol, salicylic acid, water, glycerin.

Rejuvi "a" Retinyl Serum: avocado oil, propylene glycol, deionized water, polysorbate 60, retinyl palmitate, tocopherol, retinyl acetate, retinol, essential oil.

Rejuvi "m" Massage oil: aloe vera oil, avocado oil, jojoba oil, evening primrose oil, Vitamin E, essential oil.

Rejuvi Scar/Stretch Mark Treatment

Treatment Procedures:

1. Cleanse the scar area/stretch mark area with Rejuvi "k" Facial Cleanser and dry well. Apply Rejuvi "a" Retinyl Serum and rub into even distribution. Repeat every night for 5 - 7 days as preparation before the treatment.
2. Cleanse the scar area/stretch mark area with Rejuvi "k" Cleanser and dry well.
3. Apply 3 to 4 coats of Rejuvi Peeling Formula over the scar area using a brush. Allow to dry for approximately 2 minutes using a hand fan or a portable electrical fan after each coat.
4. After the final coat has been applied, instruct the client not to wash the treated area for 2 days (minimum 48 hours).

Home Care Program:

After washing the treated area, apply "m" Massage Oil every night for 5-7 days.

Rejuvi Skin Lightening Treatment

Short & Simple version

Rejuvi Skin Lightening Treatment combines with Fruit Complex and Whitening Formula to achieve a synergistic effect to improve skin tone and pigmentation problems as well as dark eye circles. This is the most effective professional treatment available today.

Rejuvi Lightening Treatment contains precious superfine pearl powder and multiple anti-oxidants in an air-tight vial to preserve the maximum potency. Therefore, Rejuvi Lightening Treatment provides an immediate improvement in skin tone after 30 minutes or so.

Rejuvi Lightening Treatment can be performed once per week or every other week. Since the skin whiteness is limited by individual genetics, Rejuvi Skin Lightening Treatment is designed to help recover the best skin tone. Once the skin tone has approached its maximum, further gain may be very limited. It is important to understand the limit of Rejuvi Skin Lightening Treatment and avoid over expectation.

Treatment Products Required:

1. Rejuvi Lightening Treatment
2. Rejuvi Fruit Complex #1
3. Rejuvi Whitening Formula

Other Products Needed:

1. Rejuvi Facial Cleanser
2. Rejuvi Skin Healing Gel
3. Rejuvi Herbal Mask.
4. Rejuvi Super Soothing Lotion
5. Rejuvi Facial Sun Block (SPF40) two versions available - regular and tinted (skin color)

Ingredients of Treatment products

Rejuvi Lightening Treatment: pearl powder, ascorbic acid, kojic acid, cysteine, sodium metabisulfite, ginkgo extract.

Rejuvi Fruit Complex #1: deionized water, ethanol, polysorbate 60, sodium lactate, sodium citrate, glycolic acid.

Rejuvi Whitening Formula: water, propylene glycol, wheat germ extract, arbutin, Magnesium ascorbyl phosphate, licorice extract.

Treatment Procedures:

1. Cleanse face with Rejuvi Facial Cleanser and rinse well.
2. Shake Rejuvi Fruit Complex #1 well and pour 2-3 ml into a small vessel. Apply to face with a brush or cotton swab, avoiding eye area. Leave Fruit Complex #1 on skin for 2-4 minutes depending upon the comfort of your client.
3. Remove Fruit Complex with a cool & wet towel several times. Dry the skin well.
4. Transfer 7 or 8ml of Rejuvi Herbal Mask and 3 or 2 ml of Rejuvi Skin Healing Gel into the small plastic cup provided in Lightening Treatment box (should read about 10 ml level on the cup).
5. Pour the contents of one vial of the Rejuvi Lightening Treatment into the above plastic cup and mix well with the spatula provided. Then apply the mixture to the face immediately and leave on for 20-30 minutes
6. Remove mask completely using a warm, damp towel. Dry the skin well.
7. Apply Rejuvi Whitening Formula with a brush to the entire face avoiding the eye area. An even and light coat is sufficient. Let Whitening Formula absorb well and the skin dry.
8. Apply Rejuvi Super Soothing Lotion then apply Rejuvi Facial Sun Block to complete the treatment. Make sure there is no contact with water for at least 6 hours.

Home Care Program:

Morning: Rejuvi x-cell Vitamin C Complex, then Skin Moisturizer (if necessary), Facial Sun Block (SPF40) at last.

Evening: Rejuvi Whitening Cream or Rejuvi Lightening Serum. Apply Rejuvi Night cream on the top of Lightening Serum if the skin feels dry.

Rejuvi Brown Spot/Mole Removal

Rejuvi Round 52 needle is great for opening the skin on sizable spots than Lancet (reusable after sterilization)

Rejuvi has developed Spotaway - a new unique brown spot removal technique. This technique makes melanin gradually separate from normal skin tissue and finally peels off. This "extraction" method is substantially more effective than traditional "bleaching" method. Furthermore, Spotaway inhibits the skin's "memory" to minimize the chance of brown spot regeneration which is the drawback of most other removal methods.

This technique is simple, easy and convenient. This method is designed for removing brown spots, freckles, and common moles (not malignant melanoma). This technique may be used to remove skin tags (small colorless skin elevation) and fat deposit (cholesterol pad).

Rejuvi Spotaway is simple, easy, quick and convenient. It is the most advanced and cost effective tool for skin care professionals.

Treatment Products & items required:

1. Rejuvi Spotaway
2. Painaway Solution (topical anesthetics)
3. Rejuvi San-clean
4. Acne lancet
5. Magnified lamp

Other Product Needed:

1. Rejuvi "h" Super Soothing Cream

Rejuvi Brown Spot/Mole Removal

Ingredients:

Rejuvi Spotaway:

deionized water, magnesium oxide, n-propanol, benzoic acid, triethanolamine, phytic acid.

Rejuvi Sani-clean:

ethanol, aloe vera gel, propylene glycol, isopropanol, glycerin, phenoxyethanol, fragrance.

Treatment Procedures:

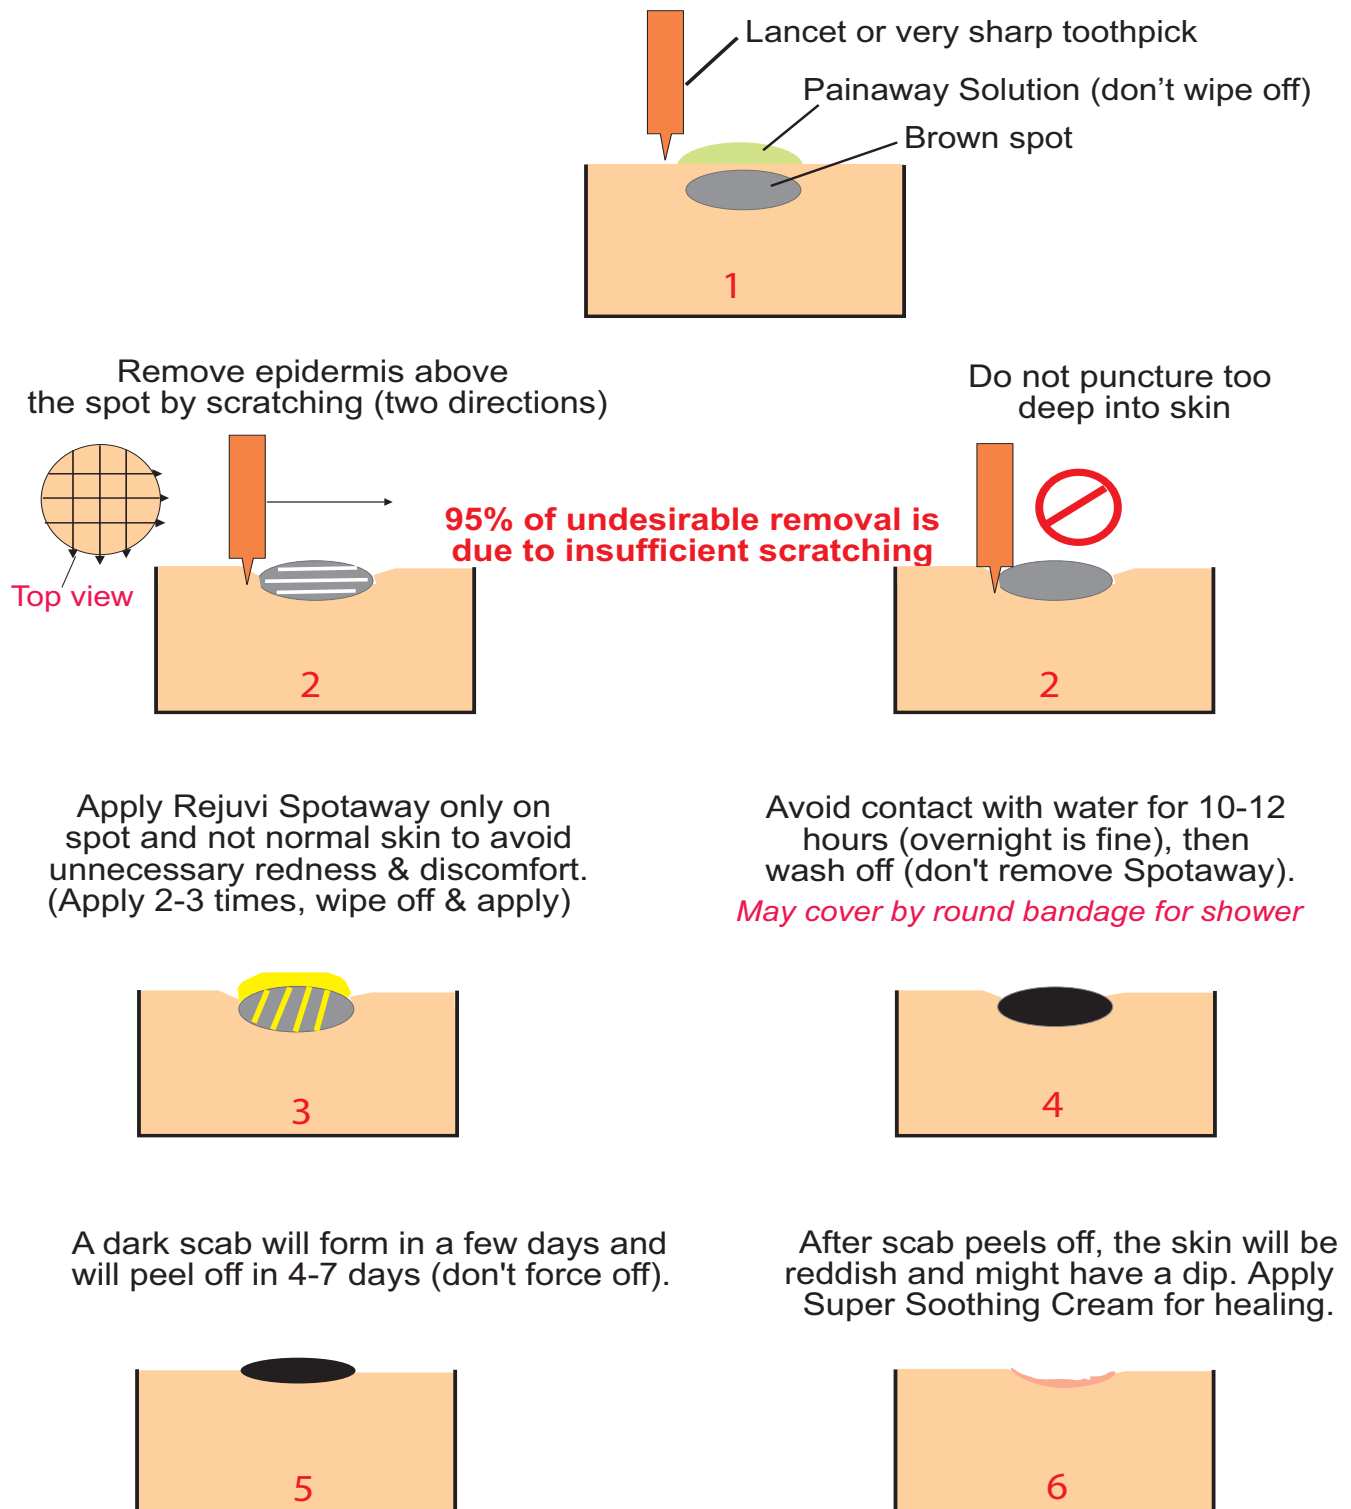

- 1) Clean the skin just above a brown spot or a mole. Apply a small drop of Painaway solution (the best topical anesthetics to avoid any discomfort in step 2). Painaway is optional but becomes necessary for a bigger spot or larger area.
- 2) Gently and evenly scratch the skin right above the brown spot or mole with an acne lancet, a tattoo needle or an object with a sharp point. Using a magnifying lamp, to make sure scratching is even and complete. A slightly bleeding is okay.
- 3) Stir Rejuvi Spotaway vigorously before use (the bottle is half full for mixing purpose). If too dry, a few drops of distilled or drinking water can be added to adjust viscosity. Apply very small amount of Rejuvi Spotaway only on the scratched skin with a toothpick. Please do not apply Spotaway on normal skin area.
- 4) Allow drying for 1-2 minutes and then wiping off with Q-tip. Apply Spotaway second time and allow to dry for a few minutes to complete treatment (may apply Spotaway 3 times for a large spot or mole).

Home Care Program:

- 1) Avoid contact with water for 10-12 hours or overnight. A circular bandage may be used to cover the treated area for taking shower. After 10-12 hours, the treated area can be washed (usually turns to dark), however, do not rub off the brownish scab on the skin.
- 2) A dark color will appear on the treated spot area and a scab will peel off in a few days (3-5 days, it takes longer for a mole). Do not force the scab off (may rub off gently).
- 3) After a scab peels off, the brown spot or mole will be completely gone. The treated skin area will show reddish color with a dip (depending upon the spot size).
- 4) Apply Rejuvi "h" Super Soothing Cream on the area daily to help skin recovery (diminish redness and fill the dip). In case that a significant redness or infection develops before the scab peels off, a Bacitracin ointment should be applied daily until the problem is gone.

Rejuvi Brown Spot/Mole Removal

Figure 4. Diagrammatic Illustration of Rejuvi Brown Spot/Mole Removal

Rejuvi Pore Reduction Treatment

Large skin pores often associated with oily skin result in a rough, coarse and pitted surface. Rejuvi cleverly combines a number of products such as Exfoliating Mask, Peeling Formula, Lightening Treatment, etc., to effectively improve such unsightly skin conditions. This treatment is simple, safe and pragmatic. It can be performed once or twice per week until desired improvements have been obtained.

Treatment products required:

1. Rejuvi Exfoliating Mask
2. Rejuvi Peeling Formula
3. Rejuvi Pre-Peel Solution
4. Rejuvi Lightening Treatment

Other Products Needed:

1. Rejuvi "k" Facial Cleanser
2. Rejuvi "r" Skin Refreshener
3. Rejuvi "g" AHA Serum
4. Rejuvi "q" Flavonoid Complex
5. Rejuvi "h" Skin Healing Gel
6. Rejuvi "m" Massage Oil
7. Rejuvi Purifying Mask
8. Rejuvi "x"-cell Vitamin C Complex
9. Rejuvi "b" Moisturizing Lotion
10. Rejuvi "s" Facial Sun Block (SPF40)

Rejuvi Pore Reduction Treatment

Ingredients:

Rejuvi Exfoliating Mask:

deionized water, papaya extract, lemon peel powder, chamomile powder, kaolin, ginseng root powder, sunflower oil, stearic acid, glyceryl stearate, polysorbate 20, glycolic acid, salicylic acid, triethanolamine, methylparaben.

Rejuvi Pre-Peel Solution:

Deionized water, ethanol, dipotassium glycyrrhizinate, stearyl glycyrrhetinate.

Rejuvi Peeling Formula:

ethanol, lactic acid, papain, resorcinol, salicylic acid, water, glycerin.

Rejuvi Lightening Treatment:

pearl powder, ascorbic acid, kojic acid, sodium metabisulfite, cysteine, ginkgo extract.

Treatment Procedures:

1. Remove makeup with Rejuvi "k" Facial Cleanser.
2. Cleanse face again with Rejuvi "k" Facial Cleanser and rinse well.
3. Apply Rejuvi Exfoliating Mask to the face and leave on for 10- 15 minutes.
4. Massage Rejuvi "h" Skin Healing Gel into skin while using steam at the same time. A little Rejuvi "m" Massage Oil may be added for extra lubrication. Remove the excess with a warm towel.
5. Extract what is needed using light steam if available.
6. Using cotton pads, apply Rejuvi "r" Skin Refreshener all over face.
7. Apply Rejuvi Pre-Peel Solution with a brush and let dry for about a minute.
8. Apply Rejuvi Peeling Formula with a special cotton applicator (see Figure 2.). Several coats (2-5 coats) may be applied to areas. Make sure there is no dripping from the applicator and dry well with a hand fan or portable electrical fan after each coat. After the last coat, leave on the skin for 3 - 5 minutes then remove with cool, damp towels.
9. Mix approximately 2 ml of Rejuvi "h" Skin Healing Gel with 8 ml of Rejuvi Purifying Mask in the small plastic cup (provided in Lightening Treatment), Tapping the cup to settle the mixture (read about 10 ml scale on the cup).
10. Pour the complete contents of one vial of Rejuvi Lightening Treatment into the cup and mix well with the spatula (provided also), then apply the mixture to the face immediately, avoiding the eye area, and leave on for approximately 20 minutes.
11. Remove with warm, damp towels.
12. Apply Rejuvi Conditioning Formula with cotton swab or brush. Don't not rinse off. Must remain on the skin for at least 6 hours (do not apply any other products).

Home Care Program:

Morning: "k" Facial Cleanser, "b" Moisturizing Lotion, "s" Facial Sun Block (SPF40).

Evening: Alternate "g" AHA Serum and "p" Skin Conditioner every other night (do not use any other products).

Retinoid Treatment

Vitamin A, also called retinol, is a yellow, fat-soluble compound found in egg yolk, butter, carrots and other vegetables. It is an essential nutrient that helps develop and maintain normal skin. Vitamin A is referred to as a normalizer that could reverse skin abnormalities including pre-cancerous cells. In addition, vitamin A is one of the most powerful anti-oxidants. Vitamin A has quite a few derivatives such as retinyl acetate, propionate, palmitate, etc. These derivatives are usually more stable than vitamin A with similar benefits to the skin. Both vitamin A and its derivatives have a distinct yellow color and are called retinoid in chemistry. All retinoid are soluble in oil only and are lipophilic. Due to its weak stability, very limited retinoid products are on the market. Even so, their strength is very low.

Rejuvi Retinoid Formula contains vitamin A and several derivatives in high concentration that constitute a unique, stable vitamin A complex. Rejuvi Retinoid Formula is designed for professional skin care. The major benefits are:

1. Super anti-oxidation and scavenges free radicals
2. Promotes regeneration of collagen and elastin
3. Normalizes skin cells and prevents skin cancers
4. Helps minimize acne and pimples
5. Excellent complement to alpha-hydroxyl acid and chemical peels

For best results one to two Retinoid Treatments per week is recommended depending on skin response. A treatment period usually involves 6 to 8 treatments.

Treatment Products Required:

1. Retinoid Formula - Due to the strong, oxidative nature of retinoid, Retinoid Formula should be kept refrigerated when not in use.

Other Products Needed:

1. Rejuvi "a" Vitamin A Complex Night Gel
2. Rejuvi "a" Retinyl Serum (more potent than "a" night gel)
3. Rejuvi "r" Clearing Toner

Retinoid Treatment

Ingredients:

Retinoid Formula:

Propylene glycol, avocado oil, tocopherol, polysorbate 60, retinyl palmitate, retinol, retinyl acetate, essential oil.

Retinoid Treatments are usually performed after a general facial treatment such as a facial mask or facial massage.

Treatment Procedures:

1. Complete a general facial massage or mask treatment.
2. Remove all products from skin and dry thoroughly.
3. Using a brush apply Rejuvi Retinoid Formula sparingly to the entire face including the neck - avoid contact with eyes. Rejuvi "q" Flavonoid Complex may be mixed with Rejuvi Retinoid Formula (1:4 or 1:3 ratio) for more benefits.
4. Apply Rejuvi "v" Nourishing Cream on top of the Retinoid Formula.
5. Do not wash face for at least 6 hours.

Home Care Program:

Morning: Use Rejuvi "h" Skin Healing Gel and Rejuvi "b" Skin Moisturizer. Use Rejuvi "s" Facial Sun Block if outdoors.

Evening: Use Rejuvi "h" Skin Healing Gel and then Rejuvi "a" Vitamin A Complex Night Gel or Rejuvi "a" Retinyl Serum nightly or every other night depending on skin compatibility. Use Rejuvi "v" Nourishing Cream if skin feels dry.

Note: Use Clearing Toner once or twice a week if yellow coloration develops.

Pre-Conditioning Technique:

Alpha-hydroxyl acids and chemical peels generally utilize water soluble ingredients that penetrate hydrophilic skin sites well. However, these ingredients may not penetrate lipophilic skin sites well. In other words, these treatments might have weaknesses.

Due to the lipophilic nature of retinoid, (i.e., retinoid penetrates very well into the skin's lipophilic sites-experiments by Rejuvi have well proven this benefit), Rejuvi Retinoid Formula is an excellent complement to a hydrophilic treatment. Therefore, Rejuvi Retinoid Treatments & home care can be used as a special pre-conditioning or preparation for AHA treatments or chemical peels (including Rejuvi Milk Peel). The pre-conditioning will significantly enhance the results of AHA treatments or chemical peels. Usually pre-conditioning takes 10 to 14 days (follows the above Retinoid Treatment & home care program).

Rejuvi Anti-Aging Eye Treatment

This is a powerful eye treatment combining a series of unique Rejuvi treatments and treatment products such as Fruit Complex, Vitamin A Complex, Vitamin C Complex, Rejuvi "z" Facial Contour Serum and Facial Treatments to achieve a synergistic, anti-aging effect on the eye area. These treatment steps are carefully arranged in a special sequence so that the delicate eye area can safely reap the benefits of these aggressive treatments. Wrinkles, crow's feet, puffiness and baggy eyes can be improved or diminished.

A treatment period consists of 4-6 treatments, plus the home care program. The treatment can be performed every week or every other week depending upon skin condition.

Treatment Products Required:

1. Rejuvi Fruit Complex Formula #1
2. Rejuvi "c" Skin Care Formula
3. Rejuvi Facial Contour Serum
4. Rejuvi "i" Eye Repair Gel

Other Products Needed:

1. Rejuvi Eye Makeup Remover
2. Rejuvi "k" Facial Cleanser
3. Rejuvi "r" Skin Refreshener
4. Rejuvi Bio Mask
5. Rejuvi Hydrating Mask
6. Rejuvi "h" Skin Healing Gel
7. Rejuvi "a" Retinyl Serum
8. Rejuvi "m" Massage Oil (optional)
9. Rejuvi "x"-cell Vitamin C Complex

Ingredients:

Rejuvi Fruit Complex Formula #1:

deionized water, ethanol, polysorbate 60, sodium lactate, sodium citrate, glycolic acid.

Rejuvi Anti-Aging Eye Treatment

Rejuvi “c” Skin Care Formula:

Deionized water, propylene glycol, glycolic acid, sodium lactate, ethanol, citric acid, TEA.

Rejuvi “z” Facial Contour Serum:

Aloe vera gel, propylene glycol, ivy extract, ginkgo extract, theophyllisilane C, caffeine, polysorbate 20, potassium sorbate, essential oil.

Rejuvi “i” Eye Repair Gel:

aloe vera gel, polyglycerylmethacrylate, propylene glycol, ginseng extract, chamomile extract, sodium hyaluronate, silk protein, carbomer, methylparaben, propylparaben, disodium EDTA, biotin, beta-glucan.

Treatment Procedures:

1. Remove Eye Makeup with Rejuvi Eye Makeup Remover then cleanse with Rejuvi “k” Facial Cleanser.
2. Apply Rejuvi “r” Skin Refreshener.
3. Apply Rejuvi “i” Eye Repair Gel and let it dry.
4. Mix Rejuvi Bio Mask or Rejuvi Hydrating Mask with Rejuvi “h” Skin Healing Gel (ratio 2:1), & apply over eye area and leave on for 10-15 minutes, then remove the mask thoroughly and dry the skin with cotton pads or facial tissues.
5. Apply Rejuvi “r” Skin Refreshener and let dry.
6. Do lymphatic drainage massage or accupressure using Rejuvi “a” Retinyl Serum or mix with Rejuvi “m” Massage Oil.
7. Gently wipe off with cotton pads or facial tissues.
8. Apply Rejuvi Fruit Complex Formula #1 and leave on skin for 4-5 minutes.
9. Apply Rejuvi “x”-cell Vitamin C Complex on top of the Fruit Complex and leave on for another 4-5 minutes – do not wash off.
10. After a total of 10 minutes, apply Rejuvi “z” Facial Contour Serum with a cotton swab or brush and leave on for an additional 10 minutes.
11. Wash off very thoroughly.
12. Mix Rejuvi “h” Skin Healing Gel and Hydrating Mask (ratio 1:1) & leave on for 2-5 minutes then wash off thoroughly.
13. Complete treatment by applying Rejuvi “x”-cell Vitamin C Complex then Rejuvi “i” Eye Repair Gel.

Home Care Program:

Daytime:

- * Do not wash face the same day as the treatment and do not cleanse the following morning – use only “r” Skin Refreshener and allow it to dry on the skin.
- * Apply “x”-cell Vitamin C Complex around the eye area excluding the eyelid.
- * Apply “i” Eye Repair Gel or Cream (for Dry skin) over the “x”-cell Vitamin C Complex.

Evening:

- * Cleanse the skin with the appropriate cleansing product.
- * Apply “r” Skin Refreshener, then Apply “x”-cell Vitamin C Complex and let dry.
- * Apply “z” Intensive Contour Gel on top of the Vitamin C Complex.

Facial Treatment for Dehydrated Aging Skin

Rejuvi cleverly utilizes some common products to effectively treat dehydrated aging skin. This treatment is a definite solution to overcome skin dryness.

Treatment Products Required:

1. Rejuvi "o" Cleansing Milk
2. Rejuvi "k" Facial Cleanser
3. Rejuvi "r" Skin Refreshener
4. Rejuvi Fruit Complex #1
5. Rejuvi "h" Skin Healing Gel
6. Rejuvi Purifying Mask
7. Rejuvi "m" Massage Oil
8. Rejuvi "q" Flavonoid Complex
9. Rejuvi Hydrating Mask
10. Rejuvi "v" Nourishing Cream

Treatment Procedures:

1. Remove makeup with Rejuvi "o" Cleansing Milk, then cleanse with Rejuvi "k" Facial Cleanser & rinse well with lukewarm water.
2. Apply Rejuvi "r" Skin Refreshener with a cotton pad.
3. Apply Rejuvi Fruit Complex #1 and leave on the skin for 1-3 minutes. Remove with a cool and damp cotton pads.
4. Mix equal amounts of Rejuvi "h" Skin Healing Gel & Rejuvi Purifying Mask and apply to face, then steam for 7 minutes.
5. Use a warm towel to remove the mask completely.

Facial Treatment for Dehydrated Aging Skin

6. Gently massage face with Rejuvi "m" Massage Oil for 5-8 minutes, then carefully wipe off – do not rinse.
7. Apply a few drops of Rejuvi "q" Flavonoid Complex and massage into face and neck.
8. Apply Rejuvi Hydrating Mask to the face and neck, then cover face with a warm towel and leave on for 15 minutes.
9. Remove the mask with a warm, damp towel.
10. Apply Rejuvi "q" Flavonoid Complex followed with Rejuvi "v" Nourishing Cream.

Home Care:

Use "v" Nourishing Cream in the morning and evening. Apply "q" Flavonoid Complex and Massage Oil in the evening before the "v" Nourishing Cream.

Rejuvi Microdermabrasion Preparation/Post Treatment

Recently microdermabrasion has become a popular technique in skin care salons and clinics; however, microdermabrasion needs appropriate skin preparation and after-care in order to achieve desired results. With extensive study and practice Rejuvi has developed the optimum skin preparation and home care program for microdermabrasion. The skin cells are well cleansed and softened before microdermabrasion. The hydration of the skin is taken care of afterwards. Anti-pigmentation and skin recovery are well considered in the home care system.

Treatment Products Required:

1. Rejuvi "c" Skin Care Formula
2. Rejuvi "x"-cell Vitamin C Complex
3. Rejuvi "q" Flavonoid Complex (optional)
4. Rejuvi "h' Super Soothing Lotion

Other Products Needed:

1. Rejuvi "o" Cleansing Milk
2. Rejuvi "k" Facial Cleanser
3. Rejuvi "h" Skin Healing Gel
4. Rejuvi "m" Massage Oil
5. Rejuvi "v" Nourishing Cream
6. Rejuvi "s" Facial Sun Block (SPF40)
7. Rejuvi Purifying Mask
8. Rejuvi Hydrating Mask

Ingredients:

Rejuvi "c" Skin Care Formula:

deionized water, propylene glycol, glycolic acid, tartaric acid, citric acid.

Rejuvi Microdermabrasion Preparation/Post Treatment

Rejuvi "x"-cell Vitamin C Complex:

deionized water, propylene glycol, magnesium PCA, sodium hyaluronate, mulberry extract, magnesium ascorbyl phosphate, essential oil.

Rejuvi "q" Flavonoid Complex:

bioflavonoid, arnica extract, sweet almond oil, polysorbate 20, vitamin K, grape seed extract, methylparaben, essential oil.

Rejuvi "h" Super Soothing Lotion:

deionized water, aloe vera gel, olive oil, decyl oleate, shea butter, glyceryl stearate, cetyl alcohol, suma extract, polysorbate 20, glycerin, arnica extract, vitamin E, allantoin, potassium sorbate, licorice extract, stearyl glycyrrhetinate, essential oil.

Treatment Procedures:

Skin Preparation -

1. Use Rejuvi "o" Cleansing Milk to remove makeup.
2. Cleanse entire face with Rejuvi "k" Facial Cleanser, then rinse well with lukewarm water.
3. Mix equal amounts of Rejuvi Purifying Mask with Rejuvi "h" Skin Healing Gel & apply to face and leave on for 10 minutes, then remove the mixture thoroughly.
4. Apply Rejuvi "c" Skin Care Formula and leave on the face for no longer than 1-3 minutes, then wash off and dry the skin thoroughly.

Perform Microdermabrasion

Post Treatment -

1. After microdermabrasion massage Rejuvi "m" Massage Oil into skin for one minute, then apply a mixture of Rejuvi Hydrating Mask with Rejuvi "h" Skin Healing Gel (2:1 ratio) and leave on face for 10 minutes. Remove and rinse well.
2. Apply Rejuvi "x"-cell Vitamin C Complex (optional: "x"-cell Vitamin C Complex mixed with Rejuvi "q" Flavonoid Complex - 3:1 ratio) and massage into skin for one minute.
3. Apply Rejuvi "h" Super Soothing Lotion and massage gently into the skin.
4. Complete the treatment by applying Rejuvi "s" Facial Sun Block (SPF40).

Home Care Program:

Morning: Apply "x"-cell Vitamin C Complex mixed with "q" Flavonoid Complex (1:1 ratio) after cleansing, then apply Rejuvi "h" Super Soothing Lotion.

Evening: After cleansing apply "q" Flavonoid Complex mixed with "x"-cell Vitamin C Complex (1:1 ratio), then apply "v" Nourishing Cream.

Rejuvi Anti-Cellulite Treatment

In today's world we want to look slim, healthy and beautiful. The recent advances in biochemical research have allowed the cosmetic industry to make great progress in the treatment of unwanted body fat. Rejuvi Contour Formula is especially designed for professional body contour treatments available in weight reduction salons and health spas. Rejuvi Contour Formula uses a high concentration of Theophyllisilane C as well as an exclusive herbal complex. Theophyllisilane C is the most advanced slimming ingredient available today. It stimulates the lipolysis (decomposition of fat) without the side effects associated with xanthenes. The organo-silicon present in Theophyllisilane C allows for a targeted or selective delivery. In other words, the active ingredients perform lipolysis on the fatty tissues within the hips, thighs or abdomen – wherever it is applied. In addition, herbal extracts improve cutaneous microcirculation and facilitate lipolysis and the drainage of the decomposed fat. This unique Rejuvi approach offers a very effective and efficient slimming program.

Rejuvi Contour Treatment must be performed at an elevated temperature to achieve desired results. The skin penetration of the active ingredients in Rejuvi Contour Formula will be enhanced significantly at an elevated temperature. Furthermore, the decomposition rate of fat dramatically increases with an increase in temperature. It is estimated that theoretically the decomposition rate can be doubled with every 10° C increase.

One anti-cellulite treatment per week, in conjunction with the Rejuvi Home Care Program achieves significant results within 3-4 weeks.

Treatment Products & Items Required:

1. Rejuvi Contour Formula
2. Rejuvi Exfoliating Mask
3. Thermo blanket (for entire body - preferred) or heating pad (available from pharmacies - several pads may be used at same time)

Other Products needed:

1. Rejuvi "k" Facial Cleanser

Rejuvi Anti-Cellulite Treatment

Ingredients:

Rejuvi Contour Formula: deionized water, propylene glycol, ginkgo extract, ivy extract, Theophyllisilane C, polysorbate 20, essential oil.

Rejuvi Exfoliating Mask: deionized water, papaya extract, lemon peel powder, chamomile powder, kaolin, ginseng root powder, sunflower oil, stearic acid, glyceryl stearate, polysorbate 20, glycolic acid, salicylic acid, triethanolamine, methylparaben.

Treatment Procedures:

1. Cleanse the area to be treated with Rejuvi "k" Facial Cleanser.
2. Apply Rejuvi Exfoliating Mask evenly over the treatment area and leave on the skin for 10 - 15 minutes.
3. Remove the mask completely and dry skin well.
4. Using a sizable brush apply Rejuvi Contour Formula evenly to the treatment area - one good coat is sufficient.
5. Allow the Contour Formula to fully absorb for a few minutes.
6. Apply Thermo blanket (whole body) or heating pad (treatment area) and set the temperature to maximum tolerable level for the client and leave on for about 30 minutes (see Figure 5).
7. Have the client take a shower.
8. Apply Rejuvi "h" Skin Healing Gel to the body and apply Rejuvi "z" Intensive Contour Gel to complete the treatment.

Home Care Program:

Morning: apply "u" Wild Yam Cream on inner legs or abdominal area every other day.

Evening: apply "z" Contour Cream and Rejuvi "z" Intensive Contour Gel alternately after shower. Do not cover with any other product and leave on at least for 6 hours. A heating Pad might be used for better results (optional).

Figure 5. Diagrammatic Illustration of Step 6.
